# Swift-E Reconfigurable 3-D Sensor WEBINAR

## Wednesday December 13, 2023. 11am to Noon

The Swift-E reconfigurable 3D sensor is an ideal solution for a wide range of industrial applications such as:
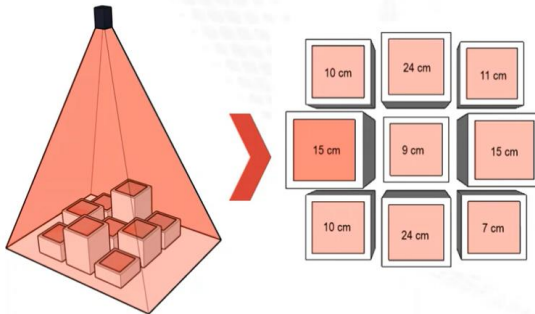

**Completeness / item count checks**

Swift-E provides no-touch, wide range solutions for validating the completeness or height of objects

**Product level detection or box filling**

Swift-E can provide level measurement of bulk materials completeness inspection

**Palletizer layering**

With Swift-E each pallet layer can be validated for completeness, ensuring the integrity of the pallet stacking.

**The FUTURE of Sensing!**

**Click Here to Register**

Join Gerrie Electric's **Smart Sensors Product Manager Christopher A. Rowles** as he shows you how the sensor industry is evolving to accommodate customer expectations for personalization and the need for more flexible manufacturing adaptations!
